SUMMARY & SKILLS

Senior Full Stack Software Engineer with 9+ years of experience building and owning full-stack web and mobile applications across startups and enterprise environments. Strong background in Python/Django, API architecture, frontend engineering, database optimization, and end-to-end product delivery. Experienced leading technical initiatives, balancing business goals with scalable implementation, and operating independently in ambiguous environments.

- Python
- Django
- SQL
- Ruby
- JavaScript
- jQuery
- HTML/CSS
- TypeScript
- React Native
- Vue
- Angular

WORK EXPERIENCE

Senior Software Developer - Hubexo

Feb 2024 - Present

- Owned architecture and end-to-end development of a full-stack web and mobile application supporting 8,000+ users, improving reliability and performance through database optimization, scalable feature delivery, and production maintenance.
- Partnered with product stakeholders to define requirements, evaluate technical tradeoffs, and deliver solutions aligned with business goals.
- Delivered performance and workflow improvements that reduced user friction and improved application responsiveness.

Founder & Lead Software Engineer - Startup Projects(Self-Employed)

Jan 2023 - Present

- Designed and developed full-stack applications from concept to production using Python/Django and modern frontend frameworks.
- Owned architecture, deployment, CI/CD, authentication, and infrastructure decisions.
- Operated with full ownership across product direction, technical architecture, deployment, and delivery in an environment with evolving requirements and limited resources.

Full Stack Software Engineer - Lofty

Aug 2022 - Feb 2024

- Owned backend feature development and API design in Django while maintaining scalable and maintainable application architecture.
- Developed and optimized RESTful APIs, enabling seamless integration between frontend and backend systems.
- Designed and implemented responsive, dynamic user interfaces with Vue.js and HTMX, enhancing UX/UI performance.
- Increased code reliability by developing comprehensive unit tests, achieving over 80% test coverage.
- Drove engineering quality through code reviews, collaboration, and testing practices that improved maintainability and reduced regression risk.

Full Stack Software Developer - University of Utah

Feb 2021 - Aug 2022

- Delivered production applications serving 40,000+ students and faculty while coordinating across multiple stakeholder groups and technical teams.
- Architected and integrated third-party APIs to deliver real-time application capabilities and improve responsiveness across user workflows.
- Optimized system performance and stability through strategic code enhancements, proactive debugging, and best development practices.

Full Stack Software Developer - Utah Valley University

May 2019 - Feb 2021

- Developed mobile application features and web pages utilized by over 40,000 students and faculty members.
- Worked closely with multiple teams to design, develop, and enhance enterprise-level software applications.
- Diagnosed and resolved complex software issues, optimizing system functionality and improving performance.

EDUCATION & CERTIFICATIONS

BS in Computer Science - Utah Valley University

Associate Python Programmer

Entry Python Programmer

CIW (Certified Internet Web Professional)

HTML5 Application
